DESCRIPTION

The **ILB-1826-CW 750mA** from IOTA Engineering is a UL Recognized LED emergency battery pack that allows the same LED fixture to be used for both normal and emergency operation. In the event of a power failure, the **ILB-1826-CW 750mA** switches to the emergency mode and operates the existing fixture for **90 minutes**. The unit includes two 7-cell long life high temperature Ni-Cad battery packs, and a single can containing a charger and converter circuit for wiring to the fixture and test accessories. A heating element and temperature control circuitry protect the battery pack from freezing during normal AC operation and allows the battery pack to reach acceptable operating temperatures before reactivating the charging circuit. The **ILB-1826-CW 750mA** is for use with an LED load up to **20W** at a rated current of **750mA**.
